Profile

An AI ML Engineer with experience in RLHF, multimodal AI, prompt optimization and AI quality assurance. Skilled in building, evaluating, and improving AI systems through structured model assessment, workflow automation, and reliability analysis. Proficient in Python, PyTorch, LLM agents, and scalable evaluation frameworks, with a strong focus on delivering accurate, reliable and production ready AI solutions.

Education

B.Tech in Electronics & Computer Engineering, 2021 – 2025
Sreenidhi Institute Of Science And Technology

Professional Experience

Turing

- AI Quality Assurance Specialist (CUA Gemini)May 2026 – Present | Hyderabad

 - Conduct structured QA workflows for browser-based Computer Use Agents (CUA) across real-world environments.
 - Design and apply structured evaluation rubrics for reasoning quality, factual correctness, and workflow compliance.
 - Validate multi-step reasoning, UI interaction accuracy, and policy compliance in agentic AI systems.
 - Identified recurring failure patterns and contributed to reliability improvements across structured evaluation pipelines.
 - Supported prompt optimization, evaluation automation, and structured QA workflows for browser-based AI agents.
 - Developed and refined prompt instructions to improve agent reliability, task completion, and policy adherence across evaluation workflows.
- LLM Evaluation Specialist (CUA Gemini)Jan 2026 – May 2026 | Hyderabad

 - Executed RLHF and SFT evaluation workflows for browser-based AI agents using structured side-by-side assessments.
 - Evaluated and optimized multi-step prompts and agent responses for reasoning quality, instruction adherence, factual accuracy, and policy compliance.
 - Identified hallucinations, reasoning inconsistencies, and grounding failures across agent workflows.
- AI Training Data Specialist (OpenAI Video Analysis)Sep 2025 – Nov 2025 | Hyderabad

 - Performed multimodal annotation of robotics tasks, human actions, and interactive video environments for vision-language model training.
 - Annotated timestamped interaction sequences to improve temporal grounding and spatial reasoning capabilities.
 - Identified inconsistencies, reasoning gaps, and failure cases in multimodal model outputs.
 - Contributed to enhanced dataset quality, action prediction accuracy, and evaluation pipeline reliability.

Google

- AI-ML Virtual InternApr 2024 – Jun 2024

 - Worked on ML workflows and foundational AI systems under structured mentorship.
 - Enhanced my skills and built an Autism detection model.
- Android Developer Virtual InternApr 2024 – Jun 2024

 - Gained hands on experience in coding, app development, and debugging.
 - Collaborating with experienced developers,
 - Enhanced my skills and built an android app for screening brain related disorders

AWS, AI-ML Virtual Intern Sep 2023 – Nov 2023
Built and tested ML models using AWS-based AI services and deployment workflows.

Research

Reverse Attribution: Explaining Model Failures via Counter-Evidence, NCNTAIA Conference

- Developed a Python-based framework for debugging machine learning models by identifying features suppressing correct predictions.
- Built automated attribution pipelines using SHAP, Integrated Gradients, and PyTorch.
- Designed Attribution-Flip (A-Flip) metrics to quantify instability in model decisions and improve failure diagnosis.
- Implemented reproducible workflows, visual dashboards, and debugging pipelines for real-world ML systems integration.

CereBro: A Cloud-Integrated Android Application for Cognitive Disorder Screening, NCNTAIA Conference

- Presented research on an AI-assisted mobile screening system integrating on-device ML, cloud services, and cognitive assessment workflows.
- Designed scalable real-time evaluation pipelines for accessible cognitive disorder screening applications.
- Explored AI-driven approaches for improving accessibility and deployment efficiency in healthcare-focused mobile systems.

Projects

Reverse Attribution , Machine Learning

- Developed a model-agnostic ML debugging framework using SHAP and Integrated Gradients to identify features suppressing correct predictions.
- Built reproducible ML debugging and attribution analysis pipelines using Python, PyTorch, SHAP, and Integrated Gradients.
- Automated failure analysis and structured reporting workflows for model debugging and evaluation.
- Developed Attribution-Flip (A-Flip) metrics to quantify instability in model predictions and improve explainability-driven failure diagnosis across ML workflows.

CereBro , Android Application

- Built an AI-enabled mobile application for early screening of autism, dyslexia, and dementia using on-device machine learning.
- Integrated LLM-based analysis modules using Python and LangChain to automate response interpretation and personalized feedback generation.
- Designed and implemented REST APIs, cloud integration workflows, and on-device ML pipelines for scalable mobile deployment.

Autism Detection , Machine Learning

- Developed a machine learning model to predict autism spectrum disorder (ASD) in children based on behavioral and genetic data for early intervention and support.

Crop Detection , Deep Learning

- Implementing deep learning models to accurately identify crop diseases from images, aiding farmers in timely disease management and enhancing agricultural productivity and sustainability.

Essay Grading , Machine Learning

- Built an AI-based essay grading system that evaluates coherence, grammar, structure, and relevance. Integrated LLMs to automate feedback generation, enhance scoring consistency, and suggest corrections using prompt-engineering workflows. Optimized Python pipelines for preprocessing and scalable inference using FastAPI.

Portfolio , ReactJS

- A personal portfolio site built using ReactJS <https://chetanaditya.netlify.app/> 

Skills

- **Programming & Frameworks** — Python · TensorFlow · PyTorch · Keras · NumPy · Pandas · Scikit-learn · OpenCV · Hugging Face · PyTorch Lightning
- **Machine Learning & AI** — Reinforcement Learning · Computer Vision · Deep Learning · Large Language Models · Multimodal AI
- **AI Evaluation, RLHF & QA** — RLHF · Supervised Fine-Tuning · Side-by-Side Evaluation · Data Quality Assurance · Annotation Guidelines · Workflow Documentation · Model Alignment
- **AI Application & Deployment / LLM & Agentic Systems** — LLM Agents · LangChain · OpenAI API · Prompt Engineering · Code Automation · AI-driven Development Tools · FastAPI · RESTful AI Services · Model Deployment
- **Data Engineering & Tools** — Data Preprocessing · Feature Engineering · Data Visualization · SQL · JSON · Jupyter · Git · Colab · API Integration
- **Research & Analytics** — Explainable AI (XAI) · Model Interpretability · Statistical Analysis · Experiment Design
- **Soft Skills** — Analytical Thinking · Cross-Functional Collaboration · Technical Documentation · Process Accountability

Certifications

Artificial Intelligence: Knowledge Representation And Reasoning , NPTEL

2024

- Studied knowledge representation formalisms, reasoning algorithms, and first-order logic.
- Applied AI reasoning concepts to structured problem-solving workflows.

AWS Academy Machine Learning Foundations , Amazon Web Services (AWS)

- Certified AWS Academy Graduate in Machine Learning Foundations, equipped with skills in AWS cloud-based machine learning technologies.

Machine Learning with Python: Foundations , LinkedIn Learning

- Certified in Machine Learning with Python, proficient in foundational concepts and practical application for data analysis and modeling.

Machine Learning Training , Internshala Training

- Certified in Machine Learning with expertise in algorithms, data analysis, and model deployment, enhancing predictive analytics capabilities.

AWS Academy Cloud Foundations , Amazon Web Services (AWS)

- Certified AWS Academy Cloud Foundations graduate skilled in fundamental cloud concepts and AWS services, ready to drive innovation.

Organizations

The Techvision Club, Designing Head

2022 – 2024

- Created engaging content for events and workshops, promoting technology and innovation as Designing Head

Ramakrishna Math, Volunteer

2021 – 2023

- Involves selfless service, spiritual growth, and community engagement, fostering inner peace and harmony.
